

Android Developer

Experience 2+ years

Description

At Sukshi, we never stop searching for innovative ways to put our state of the art Machine Learning algorithms into action, while creating useful technologies. Come be a part of the exciting journey with us, towards becoming India's leading Artificial Intelligence platform. Currently our technology is being used at a massive scale all over India at the rate of 200 TPS in production.

As an Android Developer, you will be responsible for development and launch of product features. You will have significant influence on our overall strategy by helping define these product features, drive the system architecture, and spearhead the best practices that enable a quality product.

About US

Real Human Connection is the need of the hour in the digitization-dominated world of today and this need continues to grow exponentially, as our dependence on digital devices increases. Sukshi is aimed at facilitating human connection by including emotional intelligence into existing digital communication channels. Sukshi develops a versatile platform suitable for interpreting and expressing human emotions in text, audio, and visual communication.
