Backend Developer

Experience 2+ years

Description

At Sukshi, we never stop searching for innovative ways to put our state of the art Machine Learning algorithms into action, while creating useful technologies. Come be a part of the exciting journey with us, towards becoming India's leading Artificial Intelligence platform. Currently our technology is being used at a massive scale all over India at the rate of 200 TPS in production.

You will be working on integrating, supporting, scaling different microservices on which we run the state of the art Machine Learning algorithms developed using Tensorflow, Keras and our own In-House data curation tools.

How to Apply: Please complete the MANDATORY TECHNICAL TASK given at : https://bit.ly/2AHir8U
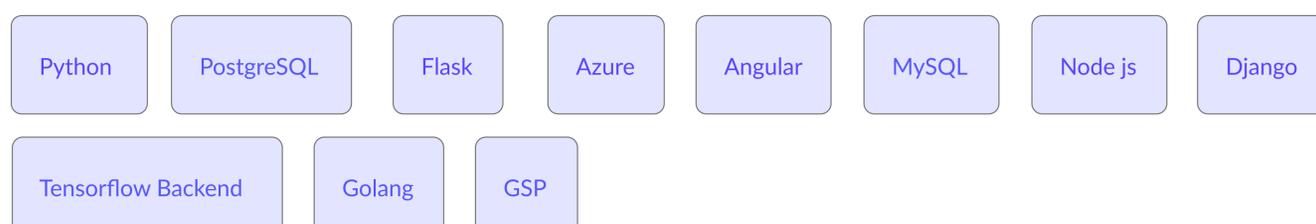

Responsibilities

○ Participate in the entire application lifecycle, focusing on coding and debugging

○ Building reusable code and libraries for future use

○ Optimization of the application for maximum speed and scalability

○ Work closely with Data Science team to improve software and user experience

○ Drive continuous integration and improvements

○ Provide production support

Requirements

○ In-depth understanding of the entire web development process (frontend, backend, database management and deployment)

○ Experience with JS frameworks like Angular, NodeJS

○ Hands on experience with programming languages like Python, Golang.

○ Familiarity with front-end languages (e.g. HTML, JavaScript and CSS).

○ Management of hosting environment, including database administration and scaling an application to support load changes

○ Experience with managing micro-services on Google Cloud, Azure Platforms

○ Experience with different web frameworks like Django, Flask, gin-gonic etc

○ Excellent experience on Rest APIs and Microservices development

○ Experience with industry leading CI/CD practices and build configuration management.

○ Should help in maintaining existing web applications and provide technical support for different existing microservices

Skills

Python	PostgreSQL	Flask	Azure	Angular	MySQL	Node js	Django

Tensorflow Backend	Golang	GSP

We Offer

○ Competitive salary

○ Casual dress code & work culture

○ Dynamic teams and creative work environments

○ Interact with several Silicon Valley Entrepreneurs

○ Work closely with several best engineer and business folks of the country

○ Extensive in-house educational opportunities

About US

Real Human Connection is the need of the hour in the digitization-dominated world of today and this need continues to grow exponentially, as our dependence on digital devices increases. Sukshi is aimed at facilitating human connection by including emotional intelligence into existing digital communication channels. Sukshi develops a versatile platform suitable for interpreting and expressing human emotions in text, audio, and visual communication.
